TeamOB Helps Businesses with Financial Impact

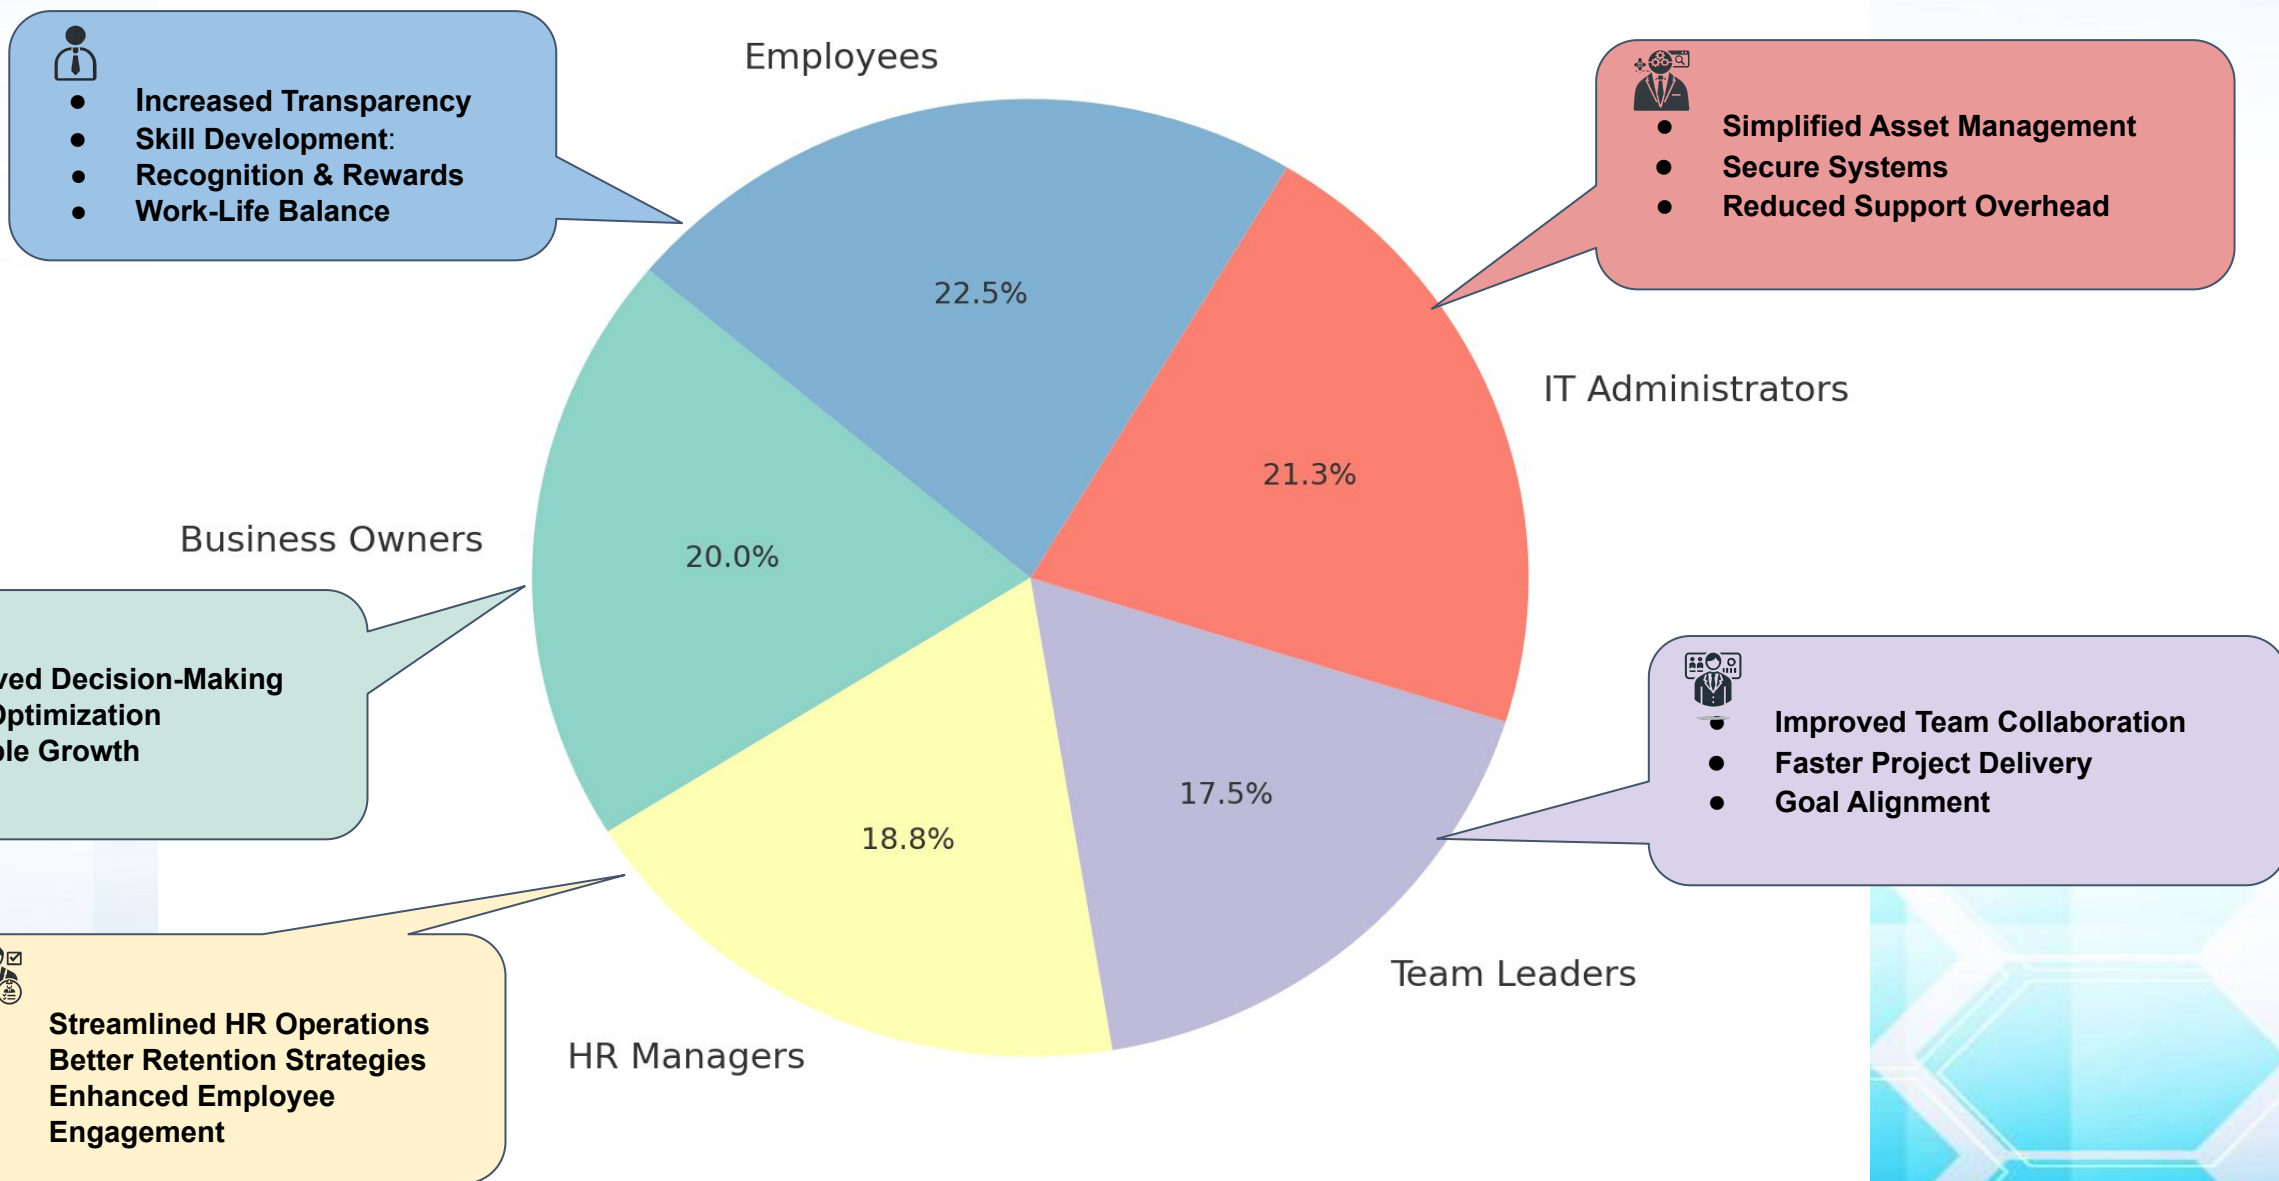

Business Challenge	Impact on Business	How TeamOB Solves It	Business Benefit	Estimated Financial Loss/Gain
1.Low Workforce Productivity	Employees spend excessive time on non-work activities, reducing efficiency.	✅ Productivity Tracking: Monitors active vs. idle time, app & website usage.	🚀 Increase productivity by 30%+ , optimize work hours.	💰 Companies lose 15-25% of annual payroll due to productivity loss. TeamOB recovers 10-20% of lost time , saving \$300K per 100 employees annually .
2.Remote Work Transparency	No clear tracking of remote employees' working hours and tasks.	✅ Work From Anywhere Monitoring: Track attendance, shift roster, and login/logout data.	💼 Improve workforce accountability, boost efficiency.	💰 Poor remote work tracking results in 10-15% time theft , costing \$150K per 100 employees annually . TeamOB can recover 80% of lost hours .
3.Time Theft & Moonlighting Detection	Employees work multiple jobs during company hours, reducing effectiveness.	✅ Screen Monitoring & Activity Logs: Detect multiple active sessions and unusual patterns.	🔍 Prevent productivity loss, increase operational efficiency.	💰 Moonlighting can reduce real work efficiency by 12-20% , leading to a \$200K annual loss per 100 employees . TeamOB prevents 80%+ of these cases .
4.IT Asset Changes & Unauthorized Device Usage	Employees may install unauthorized software or change hardware without approval.	✅ Automatic Hardware & Software Scanning: Detect and alert on any hardware/software changes.	🛡️ Prevent unauthorized software, enhance IT security.	💰 Security breaches from unauthorized installations cost businesses \$50K-\$100K annually . TeamOB reduces risk by 70% .
5.Unstructured Task & Workflow Management	Inefficiencies and delays in project execution.	✅ Creator – Custom Database & Workflow Design: Automate service desks, helpdesks, and custom workflows.	📈 Faster project execution, better team collaboration.	💰 Inefficiencies in project execution result in 5-10% revenue loss . TeamOB improves efficiency by 40% , saving \$500K per 100 employees .

TeamOB Helps Businesses with Financial Impact

Business Challenge	Impact on Business	How TeamOB Solves It	Business Benefit	Estimated Financial Loss/Gain
6. Document Processing Delays	Manual data entry from scanned documents is time-consuming and error-prone.	✔ TeamOB OCR Engine: Extracts text from scanned documents & uploads it to a custom cloud DB.	🏆 Reduce manual work, increase accuracy in document processing.	💰 Manual data processing costs \$5 per document. TeamOB reduces costs by 80% , saving \$100K+ annually .
7. Scattered Data & Lack of Insights	Data from tracking, attendance, and tasks is difficult to analyze.	✔ TeamOB Analytics: Custom dashboards, reports, and insights from collected data.	📊 Gain real-time insights, improve decision-making.	💰 Companies without analytics underutilize 30% of collected data. TeamOB increases data utilization by 70% , leading to 10% better business decisions .
8. Data Overload & Lack of AI-Based Insights	Large amounts of workforce data but no intelligent analysis.	✔ ChatGPT Integration: AI-driven analytics, insights, and automated reports.	🤖 Make smarter decisions, leverage AI for deeper insights.	💰 AI-driven insights improve business efficiency by 15%. TeamOB automates this for an average \$200K gain per 100 employees .
9. Lack of a Centralized Service Desk	Employees struggle to report issues, track resolutions, and manage service requests.	✔ Service Desk Automation: Uses CloudDB + Task Management + GCP to automate IT support & service tickets.	🏢 Reduce downtime, improve service request handling.	💰 Saves \$80K+/year (by reducing IT downtime and faster issue resolution).
10. Manual & Repetitive Operational Workflows	Routine processes require manual effort, leading to inefficiencies.	✔ Operational Workflow Automation: Uses WhatsApp + CloudDB + GCP integration to automate approvals, reporting, and alerts.	⌚ Save time, automate workflows, and improve operational efficiency.	💰 Saves \$200K+/year (reducing manual workload & process delays).
